

The GateLock Quick Start Guide

Set Up Your GateLock:

1. Install 4 x AA Batteries, listen for start up triple beep
2. Enter the 4 digit default admin Code and click the lock key (Default Code = Last 4 digits of QR-Code)
3. The LED is now blinking Green/Blue and is ready for Matter/Thread pairing (If not Green/Blue LED, see "Factory Reset" below)
4. Open compatible Smart App (Apple Home / Google / Alexa). and follow pairing instructions on the App. (Scan QR-Code on inside the cover of GateLock)
5. Test that you can lock and unlock with Smart app, and set user codes as and if required

Factory Reset:

1. Remove all but a single battery
2. Press and Hold the Lock Key
3. Install the remaining batteries Release the Lock Key
4. The system is now reset to factory defaults

Admin Code Set:

1. LED is Blinking Yellow (Ready for Admin Key)
2. Select a 4 Digit Admin Code of your choice (make note of this Code)
3. Using the Main Keypad (not remote keypad), enter this Code and confirm with a click of the Lock Key (Blue LED Blink Success Acknowledgment)
4. Quickly, within 1 second, enter the 4 digit Code a second time confirming the code with the Lock Button
5. The GateLock is now ready for Matter/Thread Pairing with the LED blinking Green/Blue

LED Status

Green/Blue blinking = Ready
Yellow solid = Admin Mode
Blue blink = Success
